

Tree Seed Care INSTRUCTIONS

Tree San Diego

1. Rinse seeds in warm water to remove dark pulp
2. Gently rub the seed edge to create a weak area
3. Soak the seeds in cold water for 24 hours
4. Plant each seed in its own pot with drainage holes on the bottom, then fill the pot with soil and sow the seeds 1/2 inch deep
5. Position the pot in a warm, bright location.
6. Keep the top 2 inches of soil moderately moist.
